

# FEYN LAB TASK2

## Online Vehicle Booking Product Startup

### CAR- RENTALS

- online platform that lets you book test drives for vehicles from different renowned brands. Get behind the wheel of your desired car and take it for a spin before making a purchase.
- An eco-friendly vehicle booking platform, featuring only electric and hybrid vehicles. In the case of diesel vehicles, proper pollution control measures are to be taken care of. (Provided, EV's era is about to come in the future hereby, planning for the current scenario)
- Featuring user reviews and ratings for a variety of vehicle models, you can be sure you're making the right choice for your needs. Trust the experiences of others and book with confidence today!
- An online vehicle booking service that allows users to compare prices from various vendors.
- One of the key features of this app is real-time tracking. This is a feature that allows users to track their vehicles in real time, providing them with up-to-the-minute updates about the location of their vehicle. This ensures that users are always informed and can plan accordingly, thereby improving their overall experience with the app.

- In addition to the online booking feature, we also offer a rewarding loyalty program to our regular customers. This program is our way of expressing gratitude by providing exclusive benefits and discounts, further enhancing their experience with us.

## **TAXI-SERVICES**

- track data about dense traffic routes.
- record of nearby work place,its timing. to build our system accordingly .
- server should be managed ,so as to handle large requests.
- easy UI for customers.
- security of both the users and drivers is to be maintained.
- In case of emergency, local police authorities are to be informed if necessary.
- show best price after comparing other online taxi booking sites.
